About This Game

You get a limited amount of money to buy traps, bombs, turrets and walls and place them in optimal positions to defend against enemies trying to harm your curious little kitten Mimi who, for some reason, keeps wandering into an array of sinister dungeons and graveyards.

Any less than optimal defensive plan, or any small mistake in executing it will lead to the death of your kitten. Given your budget for a level, you need to carefully think what objects to buy and carefully plan the exact spots where you place each object.

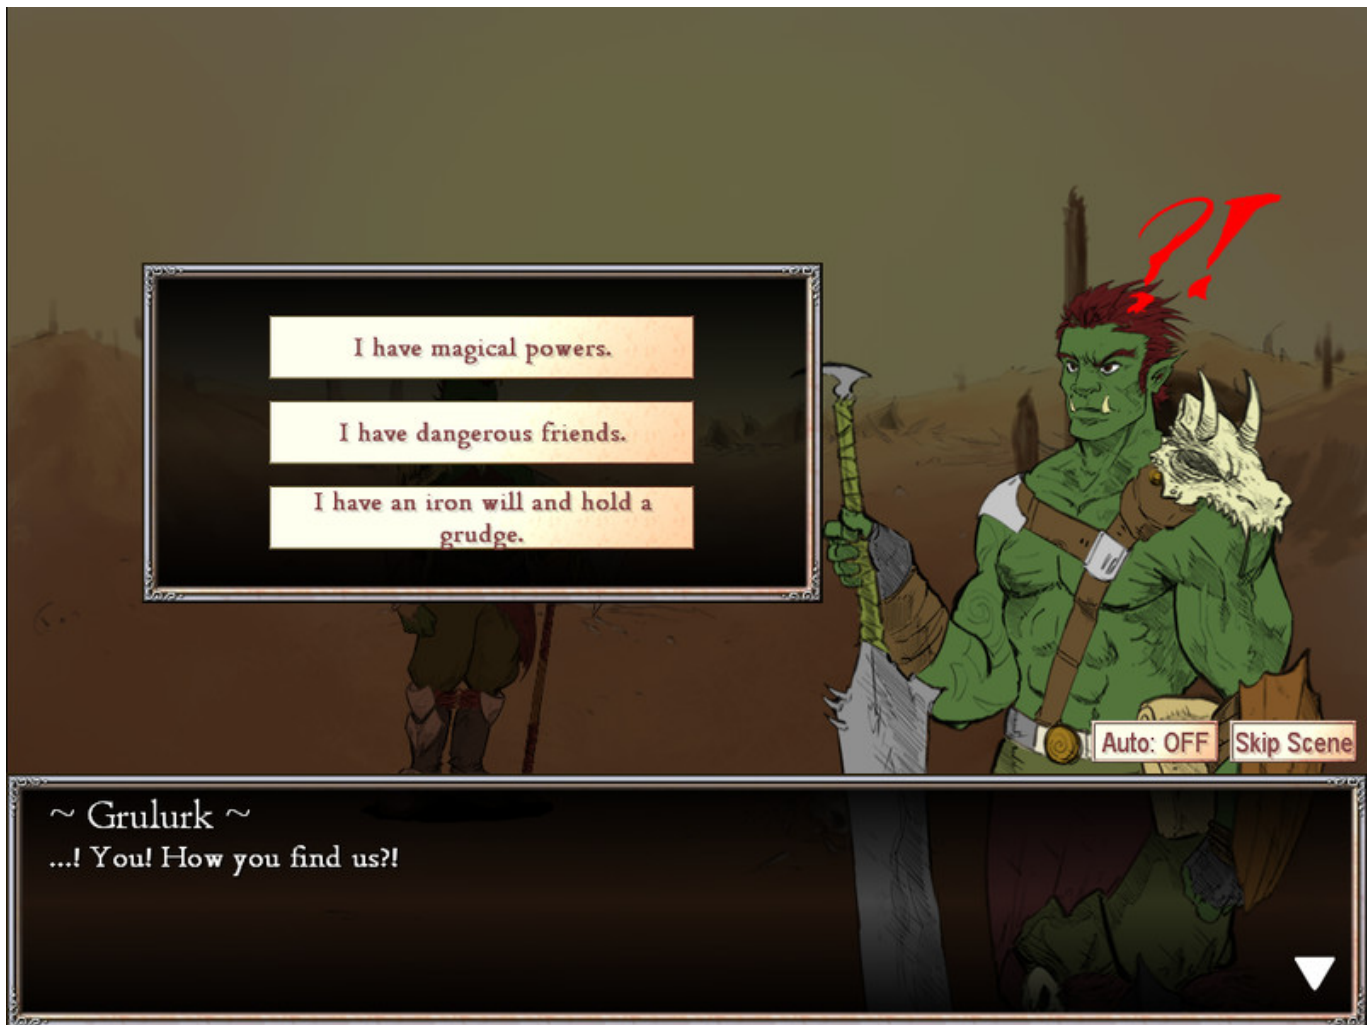

While on first glance it appears similar to tower defense games, this game requires a lot more thinking and certain puzzle-solving skills to keep your pesky little cat alive. A true test of your IQ if played with a normal or high difficulty setting. Or a strategy game that leaves a little bit of room for error with lower difficulty settings.

I kept meaning to write a review about this game since it came out, but procrastination got the better of me.

I originally played the freeware Hydorah several years ago and liked it enough to give the developer, Locomalito, some donation money. When I heard Super Hydorah was being made, I of course jumped on it as soon as it was released.

The traditional horizontal shooter style reminds me the most of Gradius. Specifically the Gradius IV/Gradius Gaiden era of the series. This also extends to the music, which has that funky jazz fusion/rock vibe. The controls, gameplay mechanics, and power up system is simple enough where you can dive into it immediately. It provides a good challenge but isn't overwhelmingly daunting. It has multiple paths and several hidden secrets to keep you invested in it. I especially like the fact that you can save/load your progress and pickup on where you left off at any time as you traverse through the multiple paths to the end.

Overall, I'm going to echo what was mostly said about this game already and say that it is very well crafted. The dev was obviously mindful of the elements that make a good traditional shooter and was sure to craft that into this game. The Gryzor87 composed soundtrack is great too. "No Mercy" in particular I enjoy. For the shooting game fan of any type, this is definitely a must have game.. Don't like someone? will instead of \u2665\u2665\u2665\u2665ing filling them IRL fire up this game and absolutely murder some \u2665\u2665\u2665\u2665ing people by hitting them so hard they go faster than the speed of sound. 12/10 why wouldn't you get this game when getting VR.. Take control of a Ukrainian ninja.

Navigate the levels with double jumps and wall grabs. Collect coins to spend at the shop. Health refills, throwing stars, three guns and their ammo. AK47, rocket launcher and mini gun. Four levels current with four more on the way. Also bonus levels either between normal levels or in the bonus menu. Timed survival, race to the finish and collect all coins. Fight enemy soldiers with weapons or boss enemies with level puzzles. Like shooting the cord holding up explosives to drop them on a tank. Smooth gameplay.. lol This game was fun! Didn't last too long before i beat it, but ive still got a bunch of achievements to do! So i still have a reason to play.

If you want hours of torturous fun, get this game! Countless alterations and possibilities! Fun for the HOLE family!

lol jk, but seriously fun. This will be the first review I've written for a game on Steam. So bear with my rough assessment.

Pendragon Rising an old style text-based adventure where nearly, if not every decision you make matters in some way to the story. Unfortunately I missed the age of Text based games, so playing this as my first pure experience was quite fun.

As expected, the roughly 3 hours (per read-through) of gameplay consists solely of making decisions, leading to what kind of King Arthur/Queen Arta you will be. This consists of these main traits. Leadership, Diplomacy, Warrior, Compassion v. Ruthlessness, Bravado v. Cunning, and Old Religion v. Roman Christianity. But regardless of what kind of ruler you are, you are almost positive to get a rich story.

Pros:

- +Great and immersive story.
- +Fun experimentation with choices. Each one truly feels unique.
- +Romances (Or flings) feel pleasantly tasteful.
- +Writing is very strong, I don't recall seeing any spelling errors.

Cons:

- Personally wish the read length was longer.
- There was a choice or two I found were hard to understand what was meant in context.

Taking everything I've said I strongly recommend this game, with a solid 9/10. If you've got a few hours to spare, or even more for several read-throughs, it's definitely worth the humble price of \$4. I'm looking forward to more stories from this developer!. It's an ok mini game, considering I do an average of 115 wpm I like to try games like these to mess around with others but the game modes are a little meh, there's variation but meh. For a couple of bucks, sure, why not lol.. I love it, if your reading this then just get the software, its amazing.

I think this software is worth over \$50, but instead its super cheap and thats one thing i love about this program. I got it right on release and its super usefull alltho i do think a couple more things need to be added and a bit of bug fixes but thats fine because the possibilities are already endless. The software interface is super simple so anyone can start making manga! i hope this software becomes something great! 11/10. THIS IS CRAZY AS HELL!!! I WISH 123 SLAUGHTER ME STREET 2 COMEZ!!!!!!

Goodness, where do I begin?

Grappling in Silver Grapple is as fun as it looks. The controls are tight and polished, allowing you to a large amount of control over your character's position and speed.

The level design in Silver Grapple is equally excellent. Paired with tight controls and satisfying grappling physics, the levels test both your skill and knowledge of game the physics. The levels are always fair to the player. Instantaneous respawns, generous checkpoints, and the ability to warp back to your checkpoint if death is inevitable all help keep the game pace very fast. Deaths are not punishing, but expect to fail repeatedly. When levels are properly executed, at it's best Silver Grapple makes you feel like a proffessional acrobat.

The story and lore in the game were deep enough to get me invested, although are completely optional and secondary to the gameplay. The ost in Silver Grapple is also worth mentioning, as the chiptune soundtrack accompanying the gameplay was very pleasing to listen to. On a visual standpoint, the game environments aren't the flashiest or most well developed. However, I don't believe this to take much from game enjoyability, as the player animations are smooth and satisfying to watch again and again.

Silver Grapple is the most suprising indie game I've seen released this year. If you enjoy difficult yet rewarding platforms like Super Meat Boy, or if the trailer interests you in any way, I certainly reccomend the purchase.. I will not recommend this game until they fix it. it looks like it could be a lot of fun but my computer crashes everytime i open it. i know it isn't a hardware issue because i run games with higher requirements, from steam and others, and i do not encounter this issue. PLEASE FIX IT!. 10V10 hottest skin in the universe, including party boy ted.. Probably the worst hidden object game I have ever played. There is no story and no other puzzles than the hidden object minigames and these are very poorly executed. The graphics are low resolution and unclear, the object don't respect realistic scale and sometimes are almost entirely covered by other objects. There is a ton of other HO games way better than this one.

20%, not recommended.. doesnt seem to be working. honest to god what the ♥♥♥♥ i ran into a skeleton and he said he hated me so he crashed my game and i hadn't saved in a while what the ♥♥♥♥. I thought my young kids would enjoy this. They did not. It's very annoying. They did not have fun. I did not have fun. You will not have fun. Just find a real game. This is not a real game.
